

Sønderborg, 03<sup>rd</sup> of February 2022

To whom it might concern,

It's my great pleasure to provide this letter of recommendation for Jamal Salvi. I have been Jamal's teacher in several bachelor courses at SDU, including Computer Aided Engineering and Experts in Teams. Jamal is good in taking work initiative and a good very student.

I worked closely with Jamal, during his work with the company AmiNIC ApS. In this project, he collaborated with the company to develop an electronic nose for precise determination of meat and fish expiration dates. Jamal did an amazing job and helped the company to bring the product closer to the market launch. Jamal is a very open and communicative person, who enjoys connecting with people across cultures and exploring new ideas. Jamal is a very friendly and pleasant person to work with.

Please don't hesitate to contact me for any more information. Thank you for your time.

Sincerely,

A handwritten signature in black ink, appearing to read 'Roana', with a stylized, flowing script.
